

SEAT BELTS SAVE MORE LIVES THAN WE DO.

**Drive without a seat belt and a ticket could be the least of your worries.
JUST ASK A PARAMEDIC.**

Emergency medical personnel will tell you that seat belts save lives. They see it every day. They will also tell you:

- Wearing a seat belt decreases your risk of being seriously injured or killed in a crash by approximately 50%.
- Hospital data shows that unbelted occupants in crashes are three times more likely to require a hospital stay. On average, hospital costs for an unbelted crash victim are 55% higher than those for a belted crash victim.
- Strong seat belt laws protect families. When parents are buckled up, 90% of the time their children are too.
